

## LET'S TRANSFORM THE WAY WE TREAT WASTEWATER AND PROTECT OUR PLANET

Copenhagen, Paris, Riga, Vilnius, Sofia, Warsaw, Bucharest, and 120 other WWTP around the world are trusting us...

You can too.

### About Us

Hubgrade Wastewater Plant Performance is a holistic digital solution that optimizes operations to make water processes **smarter**, **safer** and **more sustainable**. It is state-of-the-art Real Time Control solution, leveraging data Veolia knowhow and AI to optimize the whole wastewater system, including the sewer network and treatment plant.

### What Results To Expect

Wastewater treatment operations are increasingly challenged with external factors such as price inflation, more strict quality standards or new regulations, such as the new European Urban Wastewater Treatment Directive. By choosing us, you also choose :

**Compliance:** reducing Total-N and Total-P in effluents by **up to 50%**

**Environmental Footprint:** reducing overall carbon footprint by **up to 60%**, N2O emissions by **up to 90%** and preventing wastewater treatment plant bypass by **up to 100%**

**Operating Expenses** (Electricity & Chemicals): reducing energy costs by **up to 40%**, reducing external carbon dosage and P-precipitation by **up to 100%** and increasing gas production by **up to 4%**

### Why Choose Us

Hubgrade Wastewater Plant Performance is a way to :

- Ensure the viability of your plant in the long term
- Be ready for the new European Urban Wastewater Treatment Directive and avoid unnecessary investment
- Help your operators to have more visibility and make their daily work easier
- Attract new and young talents to come working for you
- Postpone or reduce heavy investment related to load capacity increase and/or new treatment purposes
